

Blue Spruce Habitat for Humanity®

A Partnership That Helps Our Mountain Community Homeowners Stay in Their Homes

The Blue Spruce Habitat for Humanity Home Repairs Program provides vital home maintenance to local homeowners who lack the ability or resources to carry out repairs such as replacing rotten wood on decks, cleaning gutters, and performing fire mitigation.

Volunteering with the Home Repairs Program offers a meaningful opportunity for Alpha Tau Omega, Colorado School of Mines, to contribute to the well-being of families in need by helping repair affordable homes. This partnership not only creates a deep sense of fulfillment but also strengthens their brotherhood by working together on a shared cause. These shared experiences have built lasting memories and reinforced a service-oriented mindset among the fraternity members.

“It’s incredibly rewarding to see a project come together and to witness a homeowner’s reaction,” shared Fuller Clement, a member of Alpha Tau Omega. “All the homeowners were extremely kind and thankful. Mitch, the Home Repairs Program lead, has always gone above and beyond to guide our group, ensuring that everyone gets the most out of the experience—whether by learning a new skill or simply having a great time. Through volunteering with Habitat, I’ve gained many important home renovation skills that I hope to use on my own home one day.”

Alpha Tau Omega, a brotherhood committed to leadership, service, and community, embraces service as a cornerstone of their mission. They believe that giving back is one of the best ways to embody the principles they stand for. From all of us—staff, supporters, and the homeowners we serve—thank you, Alpha Tau Omega, Colorado School of Mines, for your dedication and hard work with the Blue Spruce Habitat for Humanity Home Repairs Program.
